

MEASLES-RUBELLA

Bulletin

An EPI Bangladesh Initiative

Vol #2 , January 2021

Initiative supported by WHO Bangladesh

MEASLES-RUBELLA

Bulletin

Key Highlights

- 1979 : Bangladesh introduced first dose of measles vaccine
- 2003 : Laboratory supported measles surveillance initiated
- Conducted nationwide MCV campaign in 2005/2006, 2010 and 2014
- 2012 : MR second dose introduced
- 2015 : National Verification Committee (NVC) for measles, rubella & CRS elimination formed
- 2017 : Strategic Plan for the Elimination of Measles, Rubella and CRS in Bangladesh
- 2018 : Rubella & CRS controlled certification
- The WHO SEAR Region has adopted the goal of “measles and rubella elimination by 2023”
<https://apps.who.int/iris/bitstream/handle/10665/327923/sea-rc72-r3-eng.pdf?sequence=1&isAllowed=y>
- 2020 : Significant impact of COVID-19 on measles and rubella activities
- Measles-Rubella SIAs 2020: Ongoing (12 Dec 2020 to 31st Jan 2021)

Surveillance sites

1 dot=1 facility N: 792

Bangladesh : Surveillance sites

Total Active surveillance sites 167

Total Passive surveillance sites* 792

* Also Includes active surveillance sites.

- Active Surveillance Sites
- Passive Surveillance Sites

National 2020 : Reported Coverage of MR1 and MR2

Source : DHIS2, Data as of 20 Jan 2021, 12 Facilities report pending in Dec 2020

Impact of routine and supplementary vaccination on reporting of measles cases, 2005-2020*

*Data as of 31 December 2020

MR bulletin, January 21

Data source: National EPI Surveillance

Distribution of Suspected Measles Cases 2018, 2019 & 2020*

1 dot= 1 case

Dots are randomly placed within district

Distribution of Confirmed Measles Cases 2018, 2019 & 2020*

1 dot= 1 case

Confirmed Measles=Lab confirmed+Epi-linked cases

Dots are randomly placed within district

* Progress affected due to COVID-19

*Data as of 31 December 2020

MR bulletin, January 21

Data source: National EPI Surveillance

Measles Incidence per million population 2018-2020*

Non-measles non-rubella discarded rate per 100,000 population

National target: At least 2/100,000 population in > 80% of 2nd administrative units

Legend

- <1
- 1-<2
- ≥ 2

*2nd administrative units (64 districts & 12 CC)

Age Distribution of Suspected Measles Cases

2019

N:11633

2020*

N:5508

~ One third children affected are under 2 years of age

■ <9 months ■ 9-11 months ■ 1-2 yrs ■ 2-4 yrs ■ 5-9 yrs ■ 10-14 yrs ■ ≥15 yrs

Vaccination Status in Suspected Measles Cases

2019

N:11633

2020*

N:5508

~ 60-65 cases under 2 years of age did not receive desired measles doses

Effect of Covid-19 on reporting of suspected measles case

Division	2019	2020
BARISAL	950	447
CHITTAGONG	2667	1267
DHAKA	2954	1426
KHULNA	1768	813
MYMENSINGH	565	208
RAJSHAHI	1200	692
RANGPUR	922	446
SYLHET	607	209
Grand Total	11633	5508

* Progress affected due to COVID-19

Comparison of reporting of suspected Measles cases (Jan – Dec 2019 & 2020*)

*Data as of 31 December 2020

MR bulletin, January 21

Data source: National EPI Surveillance

Comparison of Suspected Measles Cases reported 2019 & 2020*

Legend

Distribution of Measles Outbreak 2018-2020*

1 dot= 1 outbreak

Dots are randomly placed within district

Epicurve by case classification 2018, 2019 & 2020*

Measles case classification by Division from 2012-2020*

Rubella

Distribution of Confirmed Rubella Cases 2018, 2019 & 2020*

1 dot= 1 case

Dots are randomly placed within district

Congenital Rubella Syndrome (CRS)

Distribution of CRS Cases 2018, 2019 & 2020*

1 dot= 1 case

Dots are randomly placed within district

Dr Rajendra Bohara, Team Lead, IVD, WHO boharar@who.int

Initiative supported by

Dr Balwinder Singh, MO, IVD WHO singhba@who.int

Dr Md. Tanvir Hossen, DPM-EPI & Surveillance tanvirantik@gmail.com

Dr Md. Monjurul Islam Fuad. DPM-Field drfuad.dmc@gmail.com

Dr Ariful Islam, National Measles focal point, WHO IVD islam@who.int

Fozle Azim, Executive Assistant-Data Management, WHO IVD azimmd@who.int

Key Definitions

Key definitions

- **Suspected measles and rubella:** Any person in whom a clinician suspects measles infection or any person with fever and generalized maculopapular (i.e. non-vesicular) rash and any of the following:
 - Cough
 - Coryza (runny nose)
 - Conjunctivitis (red eyes)
- **Suspected CRS:** Any infant less than one year of age in whom a health worker suspects CRS:
 - A health worker should suspect CRS when an infant's mother has a history of suspected or confirmed rubella during pregnancy, even when the infant shows no signs of CRS.
 - A health worker should also suspect CRS when an infant aged 0-11 month presents with heart disease and/or suspicion of deafness and/or one or more of the following eye signs: white pupil (cataract); diminished vision; pendular movement of the eyes (nystagmus); squint; small eye ball (microphthalmos) or larger eye ball (congenital glaucoma)
- **Laboratory-confirmed measles, rubella and CRS case:** A case that meets the case definition and has laboratory confirmation of measles/rubella infection and/or isolation of virus in a clinical sample by WHO accredited national laboratory.
- **Epidemiologically-linked confirmed measles, or rubella, case:** A case that meets the clinical case definition and is linked epidemiologically to a laboratory confirmed case or another epidemiologically confirmed case.
- **Clinically compatible measles:** Any person meeting the clinical case definition in whom a laboratory investigation is not conducted and does not have epidemiologic linkage to a laboratory confirmed case.
- **Clinically compatible rubella:** Not applicable.
- Infant in whom a qualified physician detects at least two of the complications listed in (A) or one in group (A) and one in group (B).
- Cataract and or congenital glaucoma; congenital heart disease; loss hearing; pigmentary retinopathy.
- Purpura, splenomegaly; microcephaly; mental retardation; meningoencephalitis; radiolucent bone disease; jaundice with onset within 24 hours after birth.
- **Measles outbreak:** an occurrence of 3 or more suspected measles cases in one month in a rural ward/urban mahalla.
- **Rubella outbreak:** N/A
- **Non-measles non-rubella discarded case:** A suspect case that has been subjected to serology or virus identification but has not met any of the criteria for diagnosis, or a suspected case which has been linked epidemiologically to a confirmed case of another communicable disease.
- **Measles Incidence:** Annualized Incidence of Confirmed Measles (Laboratory and Epidemiologically confirmed) cases per million population.
Calculation: $\# \text{ of confirmed measles case} \div \text{Total population} * 10,00,000 * (52/\text{Epidemiological Week})$
- **Discarded Rate :** Annualized Reporting rate of non-measles non-rubella cases at national level
Calculation: $\# \text{ of discarded case} \div \text{Total population} * 1,00,000 * (52/\text{Epidemiological Week})$
