Message

Since influx of the Forcibly Displaced Myanmar Nationals (FDMNs) began on 25 August 2017 in Bangladesh, the UN agencies, many international and national NGOs came forward to provide health services to them along with Government of Bangladesh. The district health department under the leadership of the Civil Surgeon became overburdened to provide health services and to coordinate services of the different agencies. So, the DGHS decided to establish Coordination Centre at Cox's Bazar to coordinate, collaborate, cooperate and facilitate health interventions for the FDMNs. The DGHS Coordination Centre, Cox's Bazar not only coordinates the health interventions, it fielded medical officers, consultants and health workers for direct interventions, which, in turn, strengthened the Civil Surgeon's capacity to deliver adequate quality services to the FDMNs.

I am pleased to know that DGHS Coordination Centre, Cox's Bazar is going to publish a Health Bulletin to focus the coordination and health interventions for FDMNs. I hope this Bulletin will yield positive results in terms of quality and timely provision of such health services. It is expected that this Health Bulletin would be informative for stakeholders who also are giving their noble efforts for the FDMNs especially on Health.

I would like to thank all concerned Government agencies, INGOs, UN agencies, NGOs, the private sector, and civil society which are working hard for ensuring healthcare for the FDMNs.

Prof. Dr. Abul Kalam Azad

Director General

Directorate General of Health Services

Government of the People's Republic of Bangladesh

Message

Welcome to the first issue of Health Bulletin of DGHS Coordination Center, Cox's Bazar volume no.1. I am delighted that the Health Bulletin of DGHS Coordination Center Cox's Bazar is stepping ahead with its main objective to reduce the sufferings of FDMNs. This issue contains the information/data for the period, March 01 to June 15, 2018. The major activities & achievements of Coordination Center, Cox's Bazar is highlighted in this issue. I am thankful to those who have given effort by advising, designing and composing this bulletin. I am also thankful to those who contributed by sending their data and information to publish the Health Bulletin. Thoughtful and constructive suggestions from the readers will help us improve both contents and quality of the Bulletin in future.

I convey my heart felt thanks to those who put their efforts to provide all the health interventions for the FDMNs and prepared this bulletin.

Md. Sirazul Islam
Former Secretary
Ministry of Health and Family Welfare
Chief Coordinator
DGHS Coordination Center, Cox's Bazar

Introduction:

Between August 2017 and March 2018, Bangladesh has received 688,000 Forcibly Displaced Myanmar Nationals (FDMNs) since conflict occurred in Rakhine State, Myanmar. It has been the fastest and largest movement of refugees in decades. The FDMNs settlement in Cox's Bazar on the border with Myanmar is now the world's largest refugee camp. As a result, the needs for healthcare services among FDMNs are huge and pressing. The risk of disease outbreaks and other public health concerns are also high. These conditions have marked the lack of healthcare facilities for the FDMNs in Cox's Bazar.

Since the arrival of FDMNs in Bangladesh, the Government of Bangladesh (GoB) through Directorate General of Health Services (DGHS) of Ministry of Health and Family Welfare (MoH&FW) has been in the front line to deliver emergency response as well as health support. The FDMNs have been placed in 68 settlements across Ukhia Upazila and Teknaf Upazila in Cox's Bazar District as well as Naikhongchari Upazila in Bandarban District. Yet, in order to accelerate the emergency response, the GoB in bringing most of the FDMNs population together to a 3,000 acres area located in Ukhia.

Since the influx, the collaborative partnership among the government, private sector, civil societies and international development has been able to provide static health centers in 147 fixed sites with 107 doctors, 681 additional staffs, 21 ambulances and 231 vaccination teams. The static health centers aimed to provide medical emergency response to the patients. Patients requiring further treatment are referred to the nearest Upazila Health Complexes (UHC) or District Hospitals; those requiring serious treatment are referred to the Chittagong Medical College Hospital.

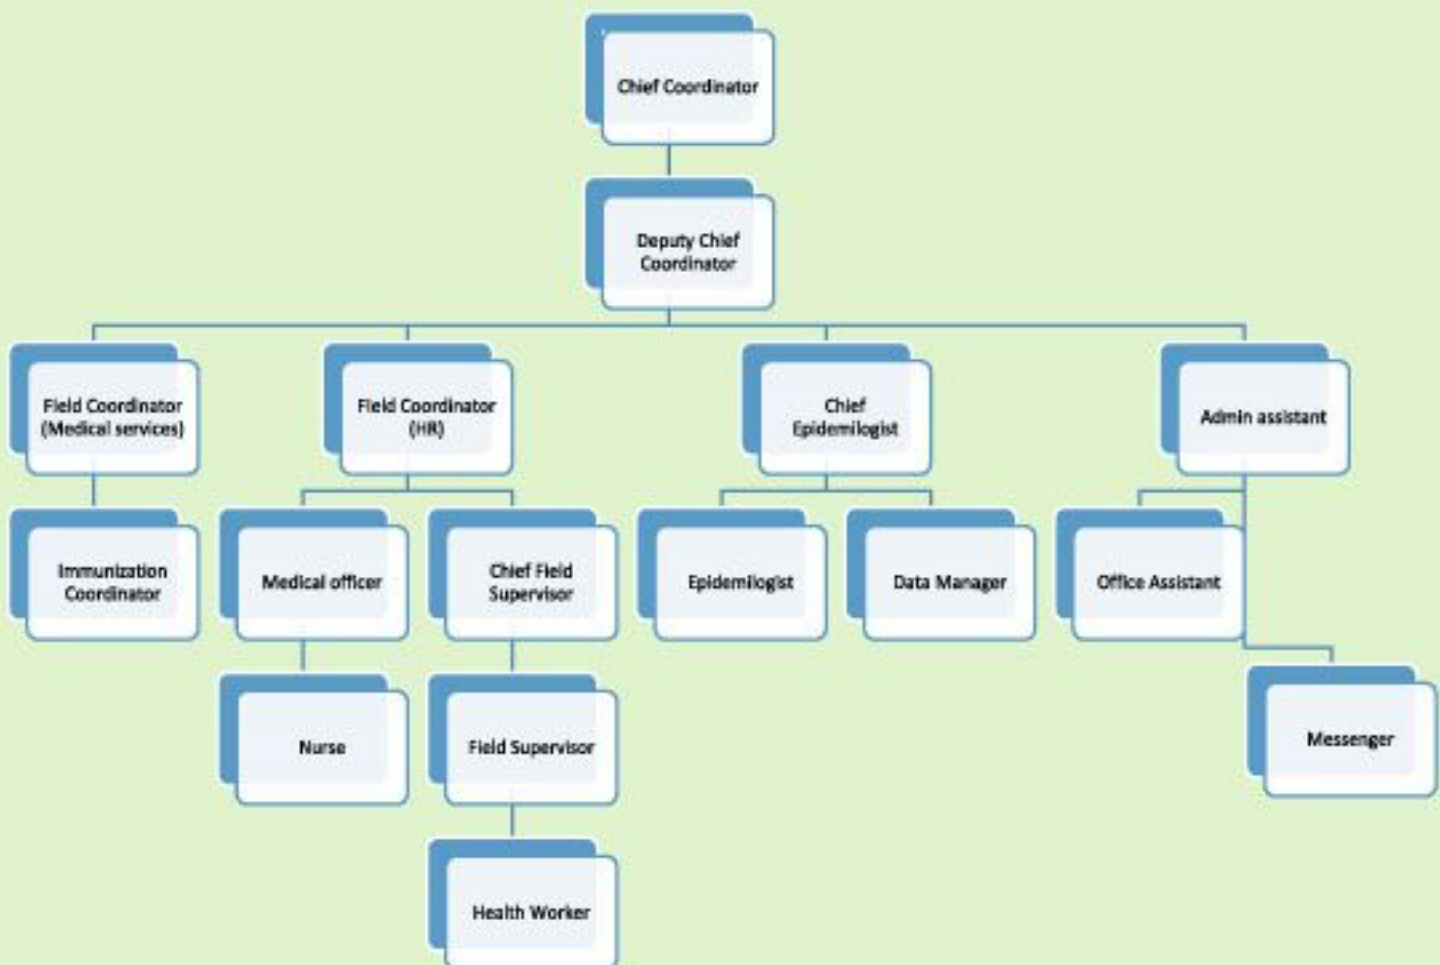

It is important to note that the collaborative partnership among the health sector stakeholders at providing emergency response has been significant. It can be seen from the health interventions which have been implemented in the recent months. Those include measles and rubella vaccination campaigns, oral polio vaccination, Vitamin A administration, oral cholera vaccination, SAM and MAM interventions. Moreover, patients have been seeking care for a range of conditions, such as: 240,000 patients suffering from unexplained fever, approximately 201,000 patients suffering from cough and cold, as well as 196,000 patients suffering from diarrhea, both acute watery and bloody.

In terms of health information, DGHS has created a public dashboard namely "Forcibly Displaced Myanmar National (FDMNs) Health Situation and Interventions in Bangladesh", which is being updated on a daily basis. Given the fact that the FDMNs camps are located in remote areas, the speed and the size of population influx as well as the availability of amenities to provide healthcare services, the achievements have been significant.

Objectives of DGHS Coordination Center:

- To sustain the achievements which have been made throughout 3rd health sector program.
- To ensure equitable humanitarian health response for the affected population.
- To provide regular, timely and accurate information to support evidence based humanitarian actions.

Organogram of DGHS Coordination center, Cox's Bazar

Director General of Directorate General of Health Services Visited Cox's Bazar:

Director General of DGHS meeting with Partners at Cox's Bazar

Prof. Dr. AbulKalam Azad, Director General of DGHS, has visited DGHS Coordination Center, Cox's Bazar for Strengthening Health Interventions for FDMNs office. A power point presentation has been delivered to inform current activities of Coordination Center. He expressed his pleasure that this office is running in the right track. He also motivated Coordination Center's employee to work hard. He emphasized to work as a team and he wants to see more creativity and innovation in data management system.

Inauguration of Jamtoli PHC by Director General of DGHS

Inauguration of Jamtoli Primary Health Care Center:

Prof. Dr. Abul Kalam Azad, Director General, Directorate General of Health Services has inaugurated Jamtoli Primary Health Care Center on March 21, 2018 supported by Swiss Red Cross. This has been a major achievement of DGHS Coordination Center because to do this PHC, Chief Coordinator of DGHS Coordination Center conducted several meetings. Moreover, DGHS Coordination Center has also provided human resources at this facility. DGHS provided Curative services while ACF providing nutrition and psychosocial support from this center. However, it is prefabricated, durable and semi-structured and one benefit of this construction is it can be relocate anywhere once FDMN populations repatriated.

Prof. Dr. Abul Kalam Azad, Director General of DGHS visited Jamtoli PHC

Temporary medical camp at Jamtoli, Cox's Bazar

Present view of Jamtoli PHC in camp 15, Ukhia Upazila, Cox's Bazar

Inauguration of Moynarghona Primary Health Care Center:

DGHS Coordination center constructed another PHC in collaboration with Swiss Red Cross and this was inaugurated on 24 May by Additional Director General (Admin) of Directorate General of Health Services Prof. Dr. Nasima sultana. She expressed her gratitude towards Swiss Red Cross for building this magnificent PHC. She introduced this PHC as a model facility and urged to replicate the idea and build more facilities like this before monsoon. She also asked partners to ensure the service quality. ADG (Admin), Assistant Director(Coord) of DGHS., Deputy Chief Coordinator, MODC and other dignitaries cut the ribbon of newly constructed PHC and visited the facility.

Later on, they visited to Jamtoli PHC and distribute basic delivery kits among pregnant women with the support from Relief Singapore (RSG). Team also visited Ukhia Upazila Health Complex to see the overall situation followed by visit at DGHS Coordination Center, Cox's Bazar to get an overview of the activities.

Inauguration of Moynarghona Primary Health Care Center by ADG (Admin), DGHS, Prof. Dr. Nasima Sultana

ADG (Admin) & Assistant Director (Coord) of DGHS visiting Ukhiya Health Complex

Health Sector Coordination:

In the past few months, the DGHS Coordination Center has conducted mapping exercises of healthcare facilities to provide information on the balance of distribution of health interventions. In order to follow the mentioned action, a number of meetings were conducted between the Chief Coordinator-DGHS Coordination Center, Civil Surgeon, Upazila Health and Family Planning Officers (UHFPO), officials from the Civil Surgeon's office as well as health sector stakeholders to discuss the vision and future plans of Coordination Centre in providing health services to the FDMNs and host communities through UHC and District Hospital.

Chief Coordinator of DGHS Coordination Center participates regularly at Health Sector Committee, Strategic Advisory Group and Emergency Preparedness meetings and provides necessary directions & recommendations. Moreover, other coordinators participate in nine other sub-committee meetings at regular basis which usually held weekly or fortnightly and provide their valuable suggestions for providing health interventions towards FDMNs. Beside these, DGHS Coordination Center regularly arrange coordination meetings with partners at office of Coordination Center and/or Civil Surgeon Office.

Health Sector Meeting

Strategic Advisory Group Meeting

Coordination for PHC/MHC:

DGHS Coordination Center, Cox's Bazar is relentlessly working for coordinating the work of different service providers and also to improve service quality. Initially, DGHS Coordination Center started delivering health services from makeshift camps which are not at all suitable for quality service.

In view of the lingering nature of the crisis and the upcoming monsoon season, DGHS Coordination Center has decided to set up 19 Primary Health Centers (PHCs) and 3 Multipurpose Primary Health Centers (MPHCs) in and around the camps both in Ukhia and Teknaf Upazila including upgrading the existing makeshift camps. These Centers will be semi-permanent, prefabricated, relocatable and durable structures.

DGHS seeks cooperation and support from the international community, development partners and organizations to construct and run these facilities to ensure uninterrupted quality health services to the FDMNs. In response to that, partners have expressed their interest to the government to provide support for the construction of a number of PHCs and MHCs and the coordination center is currently coordinating with partners to avoid duplications of service.

Collaboration & Cooperation with UNHCR:

UNHCR along with DGHS Coordination Center finalized five sites, three sites located at Ukhia (camp 7, camp 12, camp 14) and two at Teknaf (Chakmarkul and shalbon) and received approval from RRRC office for construction of 05 PHCs for DGHS Coordination Center, Cox's Bazar. A MoU has been signed between DGHS and UNHCR for supporting this purpose and tender process has completed as well. Moreover, UNHCR provided few logistics support (office furniture, photocopier etc.) and a vehicle for smooth operation of Coordination Center at Cox's Bazar.

Meeting with UNHCR

Collaboration & Cooperation with IOM:

IOM has got approval to construct three PHCs at Ukhia (Camp 10, Camp 18 and Camp 19). These PHCs will operate jointly by DGHS Coordination Center and IOM. Tender process already done and work order will place soon.

Collaboration & Cooperation with Swiss Red Cross:

Swiss Red Cross has already completed the construction of Jamtoli PHC and Moynarghona PHC which are functioning from 21 March, 2018. Moreover, construction of Barmapara PHC (camp 13) will finish soon. All of these facilities already got approval for 24/7 delivery services in cooperation with HOPE Foundation supported by UNFPA. In all of these facilities there are provisions for both solar and electric supply. Moreover, SRC provided basic furniture and a PHC officer recruited to manage admin, operation, record keeping and coordination. ACF provided nutrition and psychosocial support in all those facilities.

Meeting with Swiss Red Cross

Collaboration & Cooperation with AFAD:

Meeting with AFAD

Turkish Government wants to spend 2.4 million taka through AFAD (Disaster and Emergency Management Presidency of Turkey) and AFAD wants to utilize this fund for the development of 06 PHCs and 03 MHCs and build a two storied pre fabricated Field Hospital for FDMNs at camps through DGHS Coordination Center. MoU has already been signed between DGHS and AFAD. Site selection for these health facilities has done and got approval of land by RRRC office. PHC will be constructed at camp 2E, camp 3, camp 4, camp 5, camp 6, camp 17 and MHC will be constructed at camp 3, camp 4 and camp 20 extension.

Collaboration & Cooperation with JICA:

JICA representatives met Chief Coordinator and expressed their interest to build 2 five storied dormitory building at Ukhia and Teknaf UHC for accommodation of staffs.

Meeting with JICA

Support from UNFPA:

UNFPA provided required logistics for labor room at Jamtoli and Moynarghona PHC. It also deployed two midwives, labor room attendants for each labor room. They also gave confirmation that they will continue their support at all health facilities which run by DGHS Coordination Center. Moreover, UNFPA will provide necessary human resources and logistics for Jamtoli, Moynarghona and Tanzimarkhola PHCs to operate normal delivery services for 24/7 on these facilities. HOPE Foundation will provide 01 Security Guard, 02 Cleaners, and 02 Easy Bikes for each facility and on call ambulance services for referral cases transportation for all these facilities.

Support from Relief Singapore:

Relief Singapore will provide doctors, nurses and midwives for six months by rotation from Singapore at different health facilities through DGHS Coordination Center. It will also provide safe drinking water filter for 12 health facilities. RSG already set up 01 filter at Jamtoli PHC. RSG arranged an open day for Jamtoli PHC on 24 May and distributed 400 Basic Delivery Kits (BDK) to pregnant women at their 3rd and 4th trimester. Another 2000 BDK will deliver periodically to other camps by DGHS

Coordination of routine vaccination and special vaccination campaigns

Increasing immunization coverage among the FDMNs against vaccine preventable diseases is a priority for the health sector, both through vaccination campaigns and through strengthening of routine expanded programme of immunization (EPI). A diphtheria outbreak was detected on the 8 November 2017. In order to reduce the risk of transmission and control the outbreak, diphtheria vaccination were conducted targeting the FDMNs as well as the host community. First round of diphtheria vaccination were held on December, 2017 and DGHS Coordination Center, Cox's Bazar actively took part on that vaccination campaign, while the second round diphtheria vaccination were held before the project start date. The third round of vaccination campaign against diphtheria concluded on 25 March with 431,448 children (102.5% of estimated target) immunized. A total of 172432 children (6 months to 7 years) have been vaccinated with penta and 259016 children (7 years to 15 years) have been vaccinated with Td. A total of 4 Immunization Coordinators, 1 Chief Supervisor, 12 Field Supervisors and 24 Health Workers were deployed under this project to support the coordination and implementation of the routine vaccination as well as vaccination campaigns.

Meeting for microplan preparation at Ukhia UHC

Oral Cholera Vaccination Campaign:

A total of 891,471 people (90.5% of estimated target) have been immunized in first round cholera vaccination campaign for 2018, while the total target was 984,906. Number of person vaccinated at host community was 98868: (73.2%) out of 135000 and number of FDMNs vaccinated at camps were 792603 (93.2%) out of 849906.

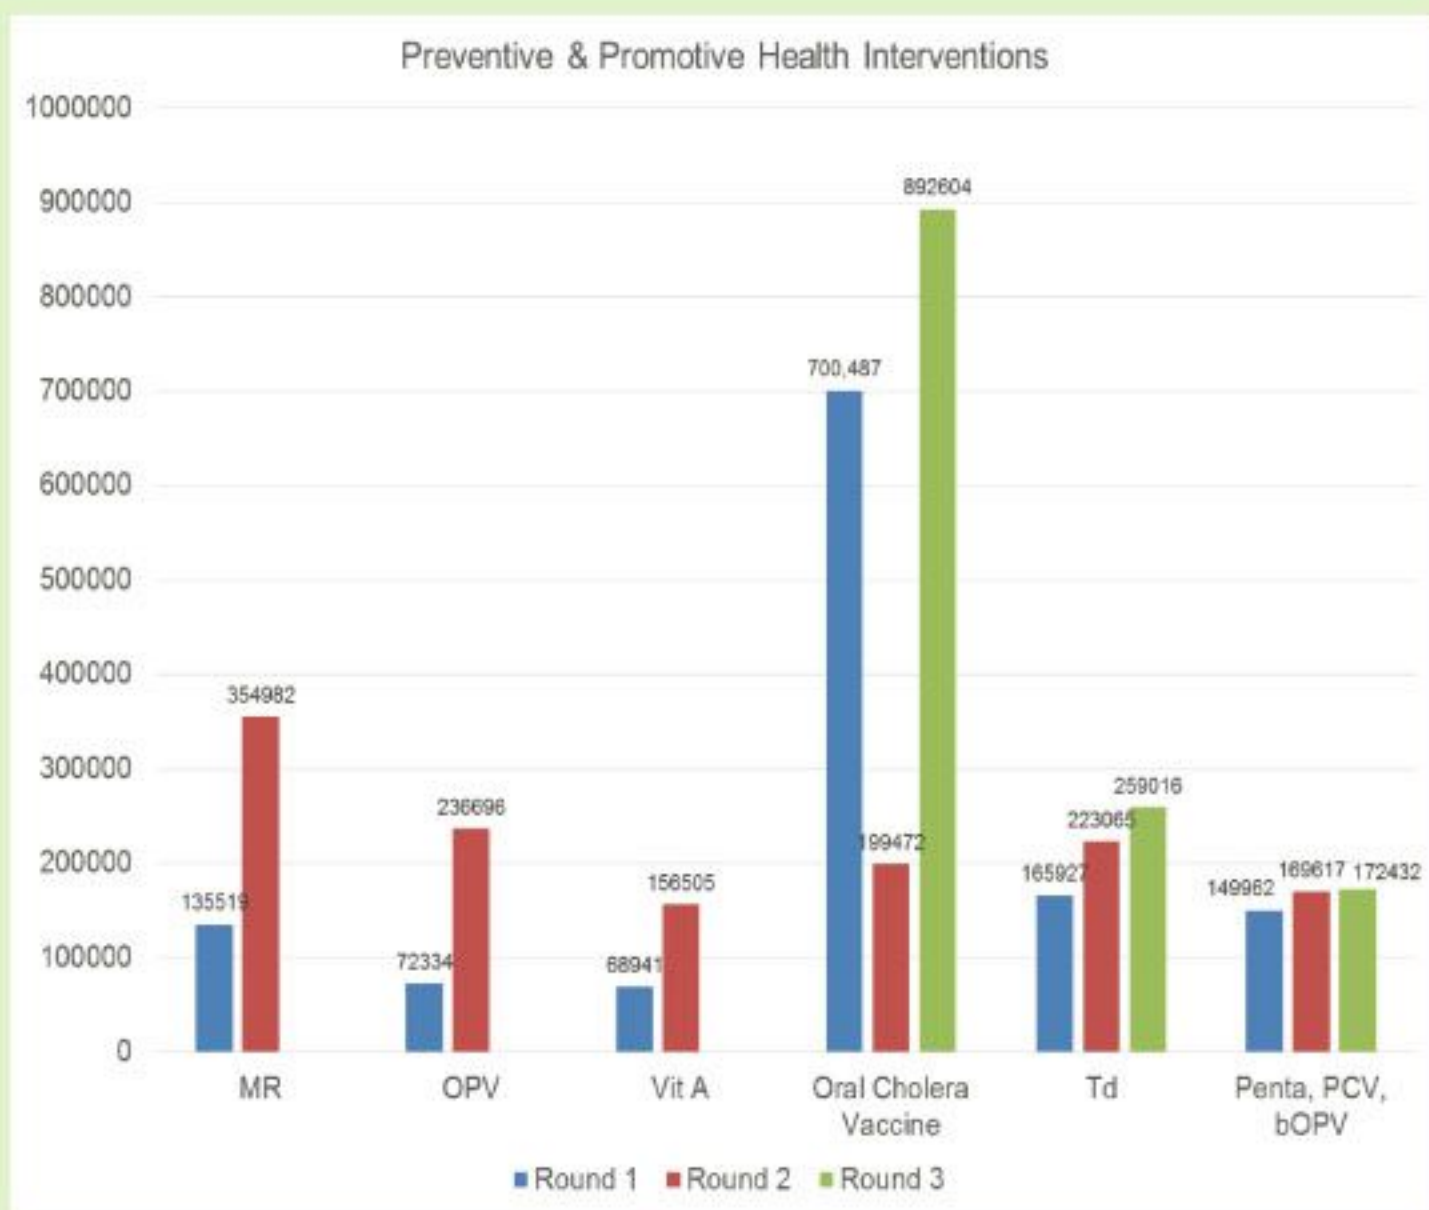

Fig-1: Achievement of Supplementary Immunization Activities (SIAs)

As FDMNs communities were deprived from basic health services, Several Supplementary Immunization Activities (SIAs) needed to be carried out for them at the camps. Figure 1 shows the achievements of Several Supplementary Immunization Activities (SIAs) held for FDMNs.

Orientation of Majhi for Diphtheria vaccination campaign

Administration of Oral Cholera vaccine during OCV campaign

EPI session visit by a Field Supervisor of DGHS Coordination Center

Children showing their finger mark after vaccination during Diphtheria campaign

Routine EPI for FDMNs:

Routine EPI has also been initiated, targeting children <2 years of age with BCG, Pentavalent, OPV, PCV and MR. Routine EPI has started from 03 June, 2018 for FDMNs camps situated at Ukhiya Upazila. In total 56 teams are working to operate 56 outreach centers in Ukhiya, among which DGHS Coordination Center contributes 08 teams. Each team for outreach center consists of 2 vaccinators. They register eligible children and pregnant women and perform IPC in one day and next day they vaccinate registered children and pregnant women in each catchment area. By this way each team covers 03 catchment areas in a week and 12 catchment areas in a month.

EPI session visit by Deputy Chief Coordinator of DGHS Coordination Center at Jamtoli PHC.

Beside this, 28 static centers are also functioning regularly but it has been decided these static centers will be operated for twice a week. Among the static centers NGOs/INGOs are operating 20 centers and DGHS Coordination Center operating 02 static centers at Jamtoli and Moynarghona PHC.

Meanwhile, in Teknaf DGHS Coordination Centre run 04 outreach centers in camp no-21 (Chakmarkul), camp no-22 (Unchiprang), camp no -23 (Shamlapur), camp no-24 (Noyapara).

Early Warning Alert and Response System (EWARS)

Since the influx occurred, WHO established EWARS to rapidly detect disease outbreak and provide response to minimize death and disease transmission in Cox's Bazar. In order to maximize the utilization of EWARS, Chief Epidemiologist and Epidemiologist have been recruited to support the system. Additionally, WHO has been conducting risk assessment periodically which enables MoH&FW and health partners obtaining potential health risk data in a timely manner. Total number of alerts raised since January 2018 is 1,755; 100% of them are verified, 0% is auto-discarded, 0% is undergoing risk assessment and 2% completed risk assessment till week 24 report (19 June, 2018).

Diphtheria update:

A total of 7772, Diphtheria cases have been reported (241 confirmed, 3608 probable and 3234 suspected cases), 42 Diphtheria deaths have been reported, 65 cases have so far been reported from the host community (30 probable, 15 suspected and 20 confirmed) till week 24 (17 June, 2018).

Revolutionary changes in Stock Management at Cox's Bazar:

Data management team of Coordination Center has developed stock management software which is an integrated logistic software/dashboard that aims to monitor the medicine stock and medical Equipment inventory in various healthcare facilities in Cox's Bazar and this software has been installed into DGHS Server. This software has designed to cover updated logistic data of Cox's Bazar District Hospital, Civil Surgeon Office, Ukhiya and Teknaf UHC. Individual facilities have access to the Stock Management System by login in to this link <http://fdmnhicord.dghs.gov.bd/>

Total Product

434

Expire within month

Item Name	Facility	Expire Date
Inj. Dexamethasone	Teknaf Upzila Health Complex	08-04-2018
7.1% Chlorhexidine di-gluconate	Teknaf Upzila Health Complex	02-04-2018
Resuscitation device (HBB kit)	Teknaf Upzila Health Complex	07-04-2018

Stock Management System Dashboard

This software has facility to show item name with expiry date within month. It shows all the facilities' GIS location into Map. This Software has facility to export stock data into Microsoft Excel. Each facility can update their logistics' expire date according to batch number.

Data Management team has maintained District EPI stock records into Software. The Data Management team also produced daily report by monitoring and updating data from the reporting sites. The team also analyzed and accumulated data of various disease including pneumonia, diabetes, diarrhea, fever, hypertension, jaundice, malaria, measles, and so on. Moreover, it also collects data about maternal, neonatal and under five children health services, family planning, psychological disorder, sexual assault etc.

Visit of Regional Director of SEARO:

The Regional Director of South East Asian Region Dr. Poonam Khetrpal Singh met officials of DGHS Coordination Center, Cox's Bazar at Hotel Sea Palace, while they discussed on several health issues including Emergency preparedness and service provided by DGHS Coordination Center. Dr. Poonam Khetrpal Singh appreciated DGHS Coordination Center, Cox's Bazar for coming forefront and playing vital role to coordinate all the health issues. She also commits to continue their support towards Coordination Center.

Later on, she visited Jamtoli PHC along with Chief Coordinator and other Coordinators of DGHS Coordination Center and praised for its set up. She wants other partners to replicate this facility. Later on she opened Routine EPI activities on the center.

RD Meet with Chief Coordinator

Visit of World Bank Team at Cox's Bazar:

A team from World Bank has visited DGHS Coordination Center as this center has been established with the support from World Bank and technical assistance of WHO to extend the arm of Civil Surgeon and for better coordination of health issues. Patrick Mullen, Senior Health Specialist, and Bushra Binte Alam, Senior Health Specialist has also performed extensive visit to the different health facilities in and around FDMNs camps. DGHS Coordination Center has presented a multimedia presentation to brief work progress, achievements, challenges, future plan and recommendations. There has been a very effective and fruitful discussion on number of health facilities and operational plan constructing by partners influenced by DGHS Coordination Center. World Bank team emphasized on developing a single detail strategic plan for entire health sector covering both FDMNs and Host Community in future. World Bank team also highlighted on establishment of Routine EPI, enhance disease surveillance system, ensuring primary health care for all, continuing support to District Sadar Hospital, Ukhia and Teknaf UHC.

World Bank team at DGHS Coordination center

Meeting with Partners:

Referral SOP has been drafted with the view to provide possible health services inside the FDMNs camps, but whenever there is a need for referral services, it should be done referral pathway. A referral pathway and referral form also been developed. These documents will be finalized by end of this month. DGHS Coordination Center, Cox's Bazar is relentlessly working for coordinating the work of different service providers and also to improve service quality. Coordination Center arranged a series of meetings with different partner organizations to set a standard for providing health services at different level such as health post, primary health center, multipurpose health center, field hospital at FDMN camp setting.

Coordination meeting with partners

Coordination meeting with partners

On job trainings arranged by DGHS Coordination center for capacity building:

Basic Training on EPI:

DGHS Coordination Center conducted three days basic training to its staffs along with Civil Surgeon Office and other organizations. The participants were Multipurpose Health Worker, Immunization Coordinator and Field Supervisor, all together forty participants.

Another three days basic training organized for immunization staffs of partner organizations for their capacity building.

Training on Helping Babies Breath (HBB): 10 nurses were participated at two days training on Helping Babies Breath (HBB) from DGHS Coordination Center. This training has been conducted by UNFPA in collaboration with HOPE Foundation.

ToT on Acute Watery Diarrhea(AWD): Two Field Supervisors from DGHS Coordination Center attended one day long Training on Trainer (TOT) for Acute Watery Diarrhea conducted by UNHCR. Later they could able to train more personnel on this issue.

Basic Training on EPI Training on Emergency Preparedness and Response (EPR)

Training on Emergency Preparedness and Response (EPR): A day long training program was conducted on Emergency Preparedness and Response for the Medical Officers, Nurses and Immunization Coordinators of DGHS Coordination Center, Cox's Bazar at Ukhia Health complex.

Training on major NCD: Another day long training program was conducted on Major Non Communicable Diseases at Teknaf Health complex for the Medical Officers, Nurses and Immunization Coordinators of DGHS Coordination Center, Cox's Bazar.

Field Activities:

To ensure the availability of adequate and sufficient medical services, the Coordination Centers recruited a total of 117 people to provide humanitarian health response in Cox's Bazar. Those were including Chief Coordinator, Deputy Chief Coordinator, Field Coordinators, Immunization Coordinators, Data Managers, Medical Officers, Nurses, Admin Assistant, Data Assistant, Cleaners as well as Messenger. They were deployed in Cox's Bazar Coordination Centre, Cox's Bazar Sadar District Hospital, Civil Surgeon Office Cox's Bazar, Ukhia UHC, Teknaf UHC of Cox's Bazar district as well as Naikhangchari UHC of Bandarban District.

Medical Service at Camp level

A family seeks for medical interventions in Tanzimarkhola medical camp, Cox's Bazar

Moreover, the Coordination Center deployed 12 medical teams to locations within Ukhia and Teknaf Upazillas. Each team consists of five staff including one Doctor, one Nurse, one Field Supervisor, and two MHC workers. The medical teams are equipped with devices to record patient

data for the integrated health information system. Those data include the profile of the patient, disease trend and the distribution of medication. To date, the Coordination Center has been able to provide medical services to 98877 patients between 1 March and 15 June 2018 (See table 1 for details)

Table 1: Patient consultations provided by location Period: 01 March to 15 June 2018		
Team No	Camp Name	Total Patients
1	Jamtoli, Ukhia	12278
2	Lambashia, Ukhia	9868
3	Taznimarkhola, Ukhia	10497
4	Hakimpara, Ukhia	7758
5	Kutupalong 1, Ukhia	8347
6	Balukhali 1, Ukhia	8217
7	Modhurchora, Ukhia	6997

Health Sessions by field staffs of DGHS Coordination Center:

Health sessions for different groups (Male group, Female group, Adolescent girls group, Pregnant and lactating mothers group, Mixed group, Children group, School students) of FDMNs were performed in regular basis and its currently going on.

DGHS Coordination Center Staffs teaching ORS preparation at community

The different contents related to Health and Hygiene have been discussed in these session, e.g- EPI, Child, Adolescent & PLW Nutrition, Use of Safe water, Use of Sandal while using latrine, Maintaining and using sanitary latrine, Hand washing in critical moments , Dumping garbage in a fixed place, Covering food, Personal hygiene, Menstrual management, Preparation of ORS etc).

The methods of sessions are –Court yard meeting, School session, Spot session, Tea stall session etc. Field Supervisors and MP Health Workers are performing this job very effectively with the support of local Majhi, Volunteers and local influential people. In some camps ANC/PNC session also has been conducted by Trained Nurse.
